<u>Wan 2.6</u>	Dialogue, reference-to-video, narrative tests	from \$0.13/sec Displayed per output second with MaxVideoAI margin included.	5s / 10s / 15s	720p / 1080p	Native / optional	Model ↗ Examples ↗ Compare ↗

Cost examples by workflow

Use these baseline workflows to choose the right starting model before opening the live calculator.

Fast social draft

5s · 720p · Silent

from \$0.26

Pika 2.2 / LTX 2.3 Fast

Good first pass for social motion before spending on higher realism.

Product ad clip

5s · 720p · Included

from \$1.58

Seedance 2.0 Fast

Useful for commercial clips and reference-led ad variants.

Cinematic realism test

4s · 720p · Included

from \$0.26

Veo 3.1 Lite

Lowest-cost Veo entry point before moving into Fast or Standard.

Dialogue / narrative

10s · 720p · Optional

from \$1.30

Wan 2.6

Predictable narrative baseline when testing audio and references.

Model pricing details

Each section has a stable anchor for internal links from model, example, and comparison pages.

LTX 2.3

LTX 2.3 pricing

LTX 2.3 is the low-friction lane for quick video drafts, prompt loops, and image-to-video experiments before moving into premium realism.

STARTING PRICE

from \$0.06/sec

Displayed per output second with MaxVideoAI margin included.

BEST FOR

Fast drafts, prompt iteration, image-to-video tests

How much does LTX 2.3 cost?

LTX 2.3 Fast is the lowest-cost current LTX path. LTX 2.3 Pro costs more per second but adds the broader workflow surface for audio, extend, and retake work.

- LTX 2.3 Fast 6s 1080p draft: \$0.32
- LTX 2.3 Pro 6s 1080p clip: \$0.47

Estimate ↗

VEO 3.1 LITE

Veo 3.1 Lite pricing

Veo 3.1 Lite should be the first Veo price check when the job needs Google realism, native audio, and a lower starting point.

STARTING PRICE

from \$0.07/sec

Displayed per output second with MaxVideoAI margin included.

BEST FOR

Lower-cost realism, short audio-ready tests

Veo 3.1 Lite vs Veo 3.1 Fast cost

Lite keeps the duration menu short and starts at the lowest Veo rate. Move to Fast or Standard when the shot needs more control or higher confidence.

- Veo 3.1 Lite 4s 720p test: \$0.26
- Veo 3.1 Lite 8s 1080p clip: \$0.84

Compare ↗

Estimate ↗

VEO 3.1

Veo 3.1 pricing

Veo 3.1 is the premium realism lane. The Fast variant is the lower-cost iteration path; Standard is the higher-confidence option.

STARTING PRICE

from \$0.13/sec

Displayed per output second with MaxVideoAI margin included.

BEST FOR

Premium realism, reference-to-video, polished tests

When should I use Lite, Fast or Standard?

Use Lite for the lowest Veo entry point, Fast for cheaper realism iteration, and Standard for the most demanding Veo shots.

- Veo 3.1 Fast 8s silent test: \$1.04
- Veo 3.1 Standard 8s with audio: \$4.16

KLING AI

Kling AI pricing

Kling pricing is useful to scan by duration because many users compare concrete 5s and 10s clip costs before choosing a model tier.

Price signals

DURATIONS

3s-15s, plus 5s / 10s on Kling 2.6

RESOLUTION

STARTING PRICE

from \$0.10/sec

Displayed per output second with MaxVideoAI margin included.

BEST FOR

Motion, humans, cinematic control, 5s and 10s clips

Kling cost by duration

Kling 2.6 Pro remains useful for 5s and 10s audio-ready clips, while Kling 3 Standard and Pro cover the current multi-prompt workflow.

- 🕒 Kling 2.6 Pro 5s silent clip: \$0.46
- 🕒 Kling 3 Pro 10s with audio: \$2.19

1080p, 4K on native 4K route

AUDIO

Native / optional

Estimate ↗

SEEDANCE 2.0

Seedance 2.0 pricing

Seedance 2.0 uses token-based video pricing, so resolution and aspect ratio matter more than on a simple flat per-second route.

STARTING PRICE

from \$0.15/sec

Displayed per output second with MaxVideoAI margin included.

BEST FOR

Commercial clips, multi-shot references, controlled output

Seedance 2.0 cost examples

Start with Fast for lower-cost commercial drafts, then move to Seedance 2.0 Standard when the approved shot needs the broader resolution set.

- 🕒 Seedance 2.0 Fast 5s 720p clip: \$1.58
- 🕒 Seedance 2.0 Standard 10s 720p clip: \$3.93

PIKA 2.2

Pika 2.2 pricing

Pika 2.2 is easiest to budget per short clip because its current MaxVideoAI workflow is built around 5s and 10s silent videos.

STARTING PRICE

from \$0.26/video

Displayed per starter clip with MaxVideoAI margin included.

BEST FOR

Short social clips, stylized loops, low-friction prompts

How much does Pika 2.2 cost per video?

Use Pika when you want a lower-friction social clip test before spending on a cinematic or reference-heavy model.

- 🕒 Pika 2.2 5s 720p video: \$0.26
- 🕒 Pika 2.2 10s 1080p video: \$1.17

WAN 2.6

Wan 2.6 pricing

Wan 2.6 is a practical narrative and reference-to-video option when you want predictable 5s, 10s, or 15s pricing.

STARTING PRICE

from \$0.13/sec

Displayed per output second with MaxVideoAI margin included.

BEST FOR

Dialogue, reference-to-video, narrative tests

Wan 2.6 cost by duration

Wan prices scale with duration and resolution. Keep the first test at 720p when validating dialogue, pacing, or references.

- 🕒 Wan 2.6 5s 720p test: \$0.65
- 🕒 Wan 2.6 10s 1080p clip: \$1.95

Generate

What affects price

- 🕒

Duration scales by model (4s / 6s / 8s / 10s / 15s).
- 📺

Resolution changes the price on models with 720p, 1080p, 1440p, or 4K tiers.
- 🖼️

Text-to-video AI, image-to-video AI, and video-to-video AI routes can price differently depending on the engine and input type.
- 🔊

Audio can be included, optional, or silent depending on the model family.
- 🌟

Engine tier (Veo, LTX, Kling, Seedance, Pika, Wan) sets the base rate.

- 🛡️

Pricing FAQ

How much does AI video generation cost?

AI video generation cost depends on the model, duration, resolution, audio setting and workflow. The comparison table shows starting MaxVideoAI prices, and the app calculator shows the exact quote before every render.

Which AI video model is cheapest?

For short silent clips, Pika and LTX 2.3 Fast are usually the lowest-cost starting points. For Veo-style realism, Veo 3.1 Lite is the lower-cost Veo option.

Is MaxVideoAI pay-as-you-go?

Yes. MaxVideoAI uses pay-as-you-go credits with no required subscription. You can start with Starter Credits from \$10 and top up when needed.

Do I need a subscription?

No. You can compare prices, open the app as a guest, preview render costs, and add credits without committing to a subscription plan.
